Weather and Climate

During this unit children will learn how weather is measured. They will learn the different parts of the water cycle. They will learn why the UK has changeable weather. They will understand climate change and what is causing it and they will learn about different types of extreme weather.

Science

States of Matter

In this unit, pupils will learn about evaporation, condensation and precipitation in detail before piecing the concepts together within the context of the water cycle. This approach is to ensure that pupils have a secure grasp of the technical vocabulary and scientific processes before going on to explain them in detail.
